Foreword

From Classrooms to Dreams

July 2025 proved what's possible when hope meets hard work.

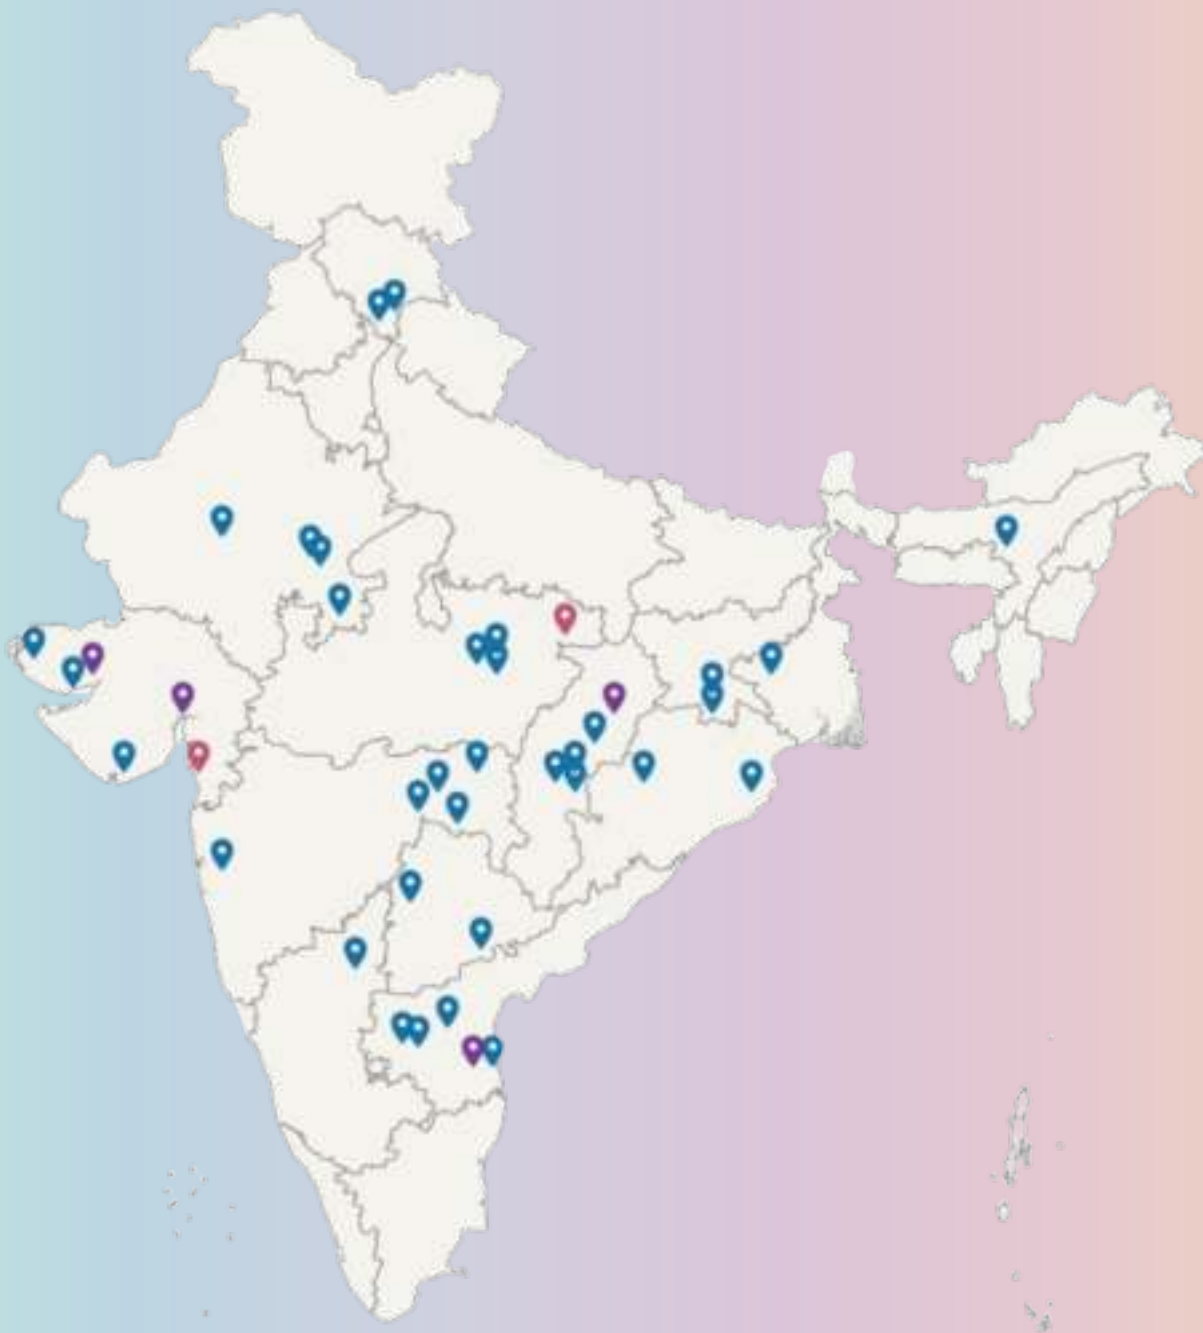

From students stepping into India's top institutions to teachers returning inspired from training in Singapore, from rakhis tied with soldiers to medals earned at state and national sports events, this month has been a celebration of dreams in motion.

We remain focused on two key goals for this academic year:

- 100% mainstreaming of Priya students
- 90%+ satisfaction from parents and students

With strong bonds between teachers, students, families, and communities, our schools are becoming truly **"A Place to Learn; A Space to Grow"**.

STEM *for* Bharat

A New Way of Learning in Adani Schools

Six of our schools have just been declared India's first STEM Schools of Excellence by National Institute of Education, Singapore. This recognition isn't about rankings or scores, it's about a new kind of classroom, where students learn by solving real problems from their surroundings.

Instead of simply reading about electricity, students build solar lamps for their villages. Instead of learning coding in isolation, they design smart dustbins or irrigation alerts. This is STEM for Bharat, relevant, rooted, and real.

The journey began in 2022 with a powerful idea from Dr. Priti Adani, the visionary Chairperson of Adani Foundation: "What if learning felt more like living, deeply rooted in everyday life of our neighborhoods?"

Since then, with support from Temasek Foundation, and in partnership with NIE Singapore, our schools have gone through a quiet revolution - training teachers, co-creating a curriculum, and building something truly Indian in spirit bringing schools and communities closer.

Last month, 15 teachers spent five days in Singapore, where they explored everything from Micro:bit technology to sustainability projects and visited local schools. They returned not only equipped but inspired.

What's next?

A co-authored book with NIE: STEM in the Indian Context (to be published by Springer)

Rolling out this model to all 43 Adani Foundation schools

This is not just a program. It's a movement to make learning purposeful again closely connected to the reality.

Tying Rakhis

Listening Brave Stories

Thanking Soldiers

Saluting the heroes who
defended our nation
with courage and
sacrifice

This Raksha Bandhan, students from Adani Public School, Mundra did something unforgettable.

They visited the Indian Army Station in Bhuj, where they interacted with brave soldiers, explored tanks and equipment, tied Rakhis, and watched real stories of bravery like Operation Sindoor.

What began as a celebration turned into something far deeper, a heartfelt tribute to the men and women who protect us every day. The pride in our students' eyes said it all.

It was a reminder that patriotism isn't just taught - it's experienced.

Creativity Meets Curriculum – Adani x Canva

In a major step towards future-ready classrooms, **Adani Foundation** has **partnered with Canva for Education**, following their MoU with NCERT.

This gives our teachers and students free access to:

- Digital design tools
- Training and certification courses
- Multilingual, inclusive content

This is more than just tech, it's about reimagining how we teach and how students learn.

Whether it's a science diagram or a history timeline, our classrooms are now more engaging and more joyful.

Thinking Differently – Technothon 2025 by IIT Guwahati

On July 13, 630 of our students took part in Technothon, a national logic and aptitude challenge by IIT Guwahati.

It wasn't about winning - it was about thinking critically, working smart, and believing in their own minds. And that's exactly what they did.

Gold, Grit, and Glory in Telangana

When our students from Mount Carmel School, Ghugus, Chandrapur, managed by Adani Foundation travelled to Telangana for the National Open Kung-Fu & Karate Championship, they didn't just participate, they made a statement.

Out of over 730 participants, they walked away with:

- The highest number of gold medals
- The title of Best Team

This win isn't just about medals - it's about confidence, discipline, and the quiet power of consistent effort.

In Focus: Adani Foundation's Shram Niketan School Shines at the Nationals

In the dusty lanes of Jamul, dreams often rise quietly. But this July, they roared loud and clear.

At the Sub-Junior National Grappling Championship held in Bilaspur, Chhattisgarh (July 26–29, 2025), students from Adani Foundation's Shram Niketan School, ACC Adani – Jamul scripted history. They returned with 4 Gold, 2 Silver, and 2 Bronze medals, a feat that stunned even seasoned athletes.

But there is a real story lies behind the medals:

These young champions come from some of the most underserved families, where proper training, equipment, or even a nutritious meal isn't guaranteed. Still, they showed up every day, practiced in open grounds, fell, got up, pushed through pain. Some fought through injuries during the championship itself. And yet, they didn't quit. They believed.

Their spirit was matched by the dedication of their principal and teachers and the consistent support of the Adani Foundation, which ensured they never felt left behind.

Growing Our Own Leaders

Neelam Paul's Journey

Some educators grow with the institution they serve. Neelam Paul is one such example.

Ms. Neelam began her journey in 2007 as a Mathematics teacher at Ambuja Vidya Niketan, Upparwahi. Over the years, she became the integral part of the school, leading CCA events, escorting students to competitions, managing exam dept, championing 5S, and always going the extra mile for her students.

What stood out was her hunger to grow. She embraced training, constantly bringing new ideas into her classroom, from joyful math strategies to better school processes.

Now, we're proud to share that she has been appointed the Principal of Adani Vidyalaya, Kawai, effective August 9, 2025.

At the Adani Foundation, we believe leadership isn't hired, it's nurtured. Neelam is a glowing example of how we groom our own, empower our own, and trust them to lead with heart, knowledge, and integrity.

ALUMNI CONNECT

Two IITians. Two Dreams. One Belief.

“

Jay Bavaskar
IIT Roorkee

He scored 97.6% in Class XII at AVMA, ranked AIR 70 (SC) in JEE Advanced, and is now an Adani Scholar studying at IIT Roorkee.

His father once earned ₹75,000 a year. Today, he runs a dosa batter stall. But Jay? Jay is dreaming of becoming a scientist. His story reminds us what belief and hard work can do, even in the toughest of conditions.

“

Raiyan Ali Sayed
IIT Guwahati

Raiyan joined AVMA in Class 3. His father is a labourer. He always knew one thing: he wanted to study at an IIT.

This year, he cracked the JEE Advanced with an EWS rank of 977, and now, with support from the Adani Scholar program, he's at IIT Guwahati, quietly building the future he always dreamed of.

These two young men, like so many others, are proof that when a child is supported, nothing is out of reach.

A New Chapter at **DAV ACC Public School, Kymore**

On 11th July 2025, DAV ACC Public School, Kymore, witnessed a proud moment as the new academic block and Kalpshila Heritage Wing were inaugurated by Mr. Vinod Bahety, CEO Cement Business, Adani Group, along with directors from ACC, Ambuja, Orient, and Sanghi.

The celebration began with a traditional tilak welcome and a vibrant folk dance, setting the tone for the day. A sculpture symbolizing holistic learning was unveiled, followed by a moving student performance on Dronacharya and Eklavya, highlighting the timeless values of dedication and respect in the Guru-Shishya tradition.

Dignitaries explored Kalpshila, a creative hub for arts, music, dance, and sports and took part in a symbolic sapling plantation drive, underscoring a shared commitment to sustainability. They also toured the newly built block featuring six modern classrooms, a Teacher Resource Centre, and a Conference Room.

The event concluded with an inspiring exhibition of student projects, showcasing innovation, creativity, and the school's growing culture of academic and human excellence.

Stay Inspired Stay Connected

This month wasn't just about medals or milestones, it was about something deeper taking shape:

- In every student who kept going, even when it got tough
- In every teacher who stepped up, inspired and inspiring
- In every girl who dreamed beyond what seemed possible

That's the heartbeat of our schools.

We'll see you again on September 5, 2025, with more stories, more breakthroughs, and more reasons to believe in what's possible, together.
